# Quick Guide to Linking Images Directly In Pyret

1. Find the image you'd like to use. If using Google Image Search or a similar search engine, click once on the image to expand it.

2. Right-click (or 2-finger click on trackpad) on the expanded image.

3. Select "Copy Image Address".

4. In Pyret (code.pyret.org), type **include image** on Line 1. Use `image-url` and paste in the URL you copied to your clipboard in Step 3. The URL should be in quotes.

5. Press "Run" to see your image appear in the Interactions window!
