Complete the following Pyret expression to produce this final image:

```
overlay(1
  overlay(2
    overlay(3
      overlay(star(50, "solid", "white"),
              circle(45, "solid", "darkblue")),
      circle(60, "solid", "darkred")),
    circle(80, "solid", "white")),
  circle(100, "solid", "darkred"))
```

Look closely at your closing parentheses: how many do you need? Mark each parenthesis you added with the number of the opening parenthesis to which it corresponds.
